THE WORLD OF MINERAL

Paragraphs of Interesting Mining News Reported From All Parts.

THE COEUR D'ALENE

Claim for Damages Filed by the Gem Company-A Heavy Bond -- Coal in Castle District-Notes.

The Julia Lane property at Silver City has been bonded for \$100,000 by Messrs. Taylor, Nissen and Brim. These gentle-men expect to immediately commence work on the property. The mine is owned by the Spanish-American Iron company, and has been a big producer. The erty is developed by a tunnel 1250 feet long and out of this tunnel ore valued at over \$800,000 has been extracted. They have at present a large body of low grade ore which it is said will assay about \$22 per ton in gold and silver.

sees will drift for ore of a higher grade, but at the same time will take out the low grade ore. The ore besides the silver and gold, contains enough fron to make it an excellent flux.—Salt Lake Trib-

One View of the Trouble.

The Helena and Frisco Mining company a claim of upwards of \$50,000 on account of the damage done it in the destruction of its mill in the riot at Gem last July. It is not our intention at this time to discuss the merits of the claim. There are some precedents in favor of the claim and there may be some against it. It is made on the ground that it is the duty of the people of the county through their officers to protect property, at least to make reasonable of fort in that direction. If the commissioners do not allow the claim suit will probably be commenced, and the county will have a long and expensive fight to make, with the possibility of having to pay at last. In any event the taxpayers are likely to have impressed upon them the fact that riots are expensive to the county as well as to individuals. There is another fact that will no doubt suggest itself to many of our citizens. For four years Shoshone county insisted on having a frunken sheriff instead of a sober one. If her business has been neglected and she as to pay for it, is it any more than could if the sheriff of this county had done his have prevented the lawlessness of last Whether or not this fact will enable the company to compel the payment of damages by the county remains to be seen .- Cocur d'Alene Miner.

To Rond the Argenta

Although A. M. Esler retired from the ersonal management of the Helena & Frisco property, we are glad to state that he has no idea of quitting the Cocur d' Menes. His investments in this country have proved exceedingly profitable, and his ability as a manager has contributed largely in bringing about this result.

Mr. Esler has been in this city during the past and in conversation with him it was learned that he has in view the purchase or bonding of the Argentine, the copper-silver property, about two and a half miles west of Wallace, and which recently reverted to the owners, having been under bond to Colonel Davey and son. Mr. Ester visited the mine this week in company with Jack Heward, who was until lately foreman of the Frisco. Both were pleased with the showing and Mr. Esler believes that the ore can be handled to advantage. However, before taking hold of the property he proposes to make a thorough test of the ore. In order to do this Mr. Howard and six or seven men are now taking out a sample lot of ore, which will be sampled at the Pioneer mill, and run through the Union concen-

If the test is satisfactory Mr. Esler will at once take possession of the property. In the event he does so, he has made a proposition to the owners of the Union concentrator, situated at the mouth of Canyon creek, to lease the mill for a period of six onths, which he would use while building a 200-ton concentrator at the Argentine.

Esler feels confident that all that is lacking to make the Argentine a steady producer and a dividend payer is proper man-agement. This has long been the belief of all who are familiar with the ore. We will be pleased to see Mr. Esler become interested in the dry ore belt, for if capabl management is all that is wanting, we feel sure that he will supply the deficiency.-Coeur d' Alene Miner.

The trouble with the hoist at the Poorman, which caused work to cease in the mine the first of the week, has been overcome, and Superintendent Thaver informs us that the night shift went on Thursday night, and the mine is now working as usual.—Coeur d'Alene Miner.

Coal of Castle.

The Castle coal fields commence just south of town and extend on south about 20 miles and are destined to become one of Castle's greatest resources. The coal in quality is equal to any found in the northwest, being a superior cooking coal, making bright silvery coke and according to analysis running as high as 68 to 71 per cent. coke, and as a bright fuel coal,burns with a lively, bright blaze, and is all burned up clean without leaving any clinkers. The coal lays in good strong seams, in the very best sandstone formation, and the most of it covered with great pressure. So far the development has not been carried to any great extent, but sufficient, however, to fully demonstrate the fact that the coal improves at a rapid rate as depth is attained.—Castle Tribune.

Copper Market.

The market is very firm, all the lake companies holding for 123/c, while 12.20 is freely bid for ingots and 1214 for cakes and wire bars without finding takers. A large amount of business has been done in casting copper, the price of which has advanced to 111/4, with the good demand continuing. Arizona pig copper, 96 per cent. is held for 10%, but there is nothing to report as having been done in it. Exports have of late been somewhat heavier. amount of business done in the specula tive sorts which are rather higher than last week, and close at £47 17s 6d for spot and £48 7s 6d for three months prompt. Consumers have been but little affected, but as their stocks are low it is supposed that they will soon have to enter the mar-ket. We quote for refined and manufac-

tured as follows: English tough, £51£51 10s; best selected, £51 10s£52; strong sheets, £59£60; India sheets, £55£56; yellow metal 5½d. Statistics in the second half of November decreased 650 tons

A Neat souvenir.

Hon. W. M. Bickford left yesterday for Helena and Chicago. Dick Marsh, the local assayer, melted down the first returns from the new stamp mill on Nine Mile and secured a gold button, which John Rowland set into a pin which Dick presented to Mr. Bickford as a souvenir from the first gold produced from Misfrom the first gold produced from Mis-soula county quartz leads. While East, Mr. Bickford will arrange for 10 more stamps for the Nine Mile works.—Mis-

John Larkins of Butte, and who is well and favorably known in these parts, is here at present looking after his mining interests and having assessment work done on several claims. He sees a bright future for Thompson Falls and, taking time by the forelock, he has already purchased a choice piece of town property.— Thompson Falls Tribune.

Cyanide Mine.

Special Correspondence of the Standard, COOKE CITY, Dec. 6.—The machinery has all come for the cyanide mill and being put up as rapidly as possible. It looks now as though the mill would be in operation by the 15th of December. eral small sales here have been made during the past two months, amounting to some \$10,000.

MONETARY CONFERENCE. Discussion Still Goes on Among the

Financiers at Brussels. BRUSSELS, Dec. 7 .- An important sec tion of the international monetary con-terence holds that Rothschild's withdrawal of his plan does not debar further the conference, the com mittee to which the plan was referred of the conference, thus taking it out of Rothschild's hands. To-day Sainstellette, a Belgian delegate who supports the Rothschild plan with the Moritz Levy mendment substituting silver for small old coins, will hold a conference with Sir ntle,deputy master of the British mint, and Foca, Spanish delegate, on the question of putting the amendment to the Rothschild plan to a vote of the confer-ence. Both Foca and Sainstelletto held the failure of the conference can yet be averted by a majority of the delegates recommending either the Levy project or the amended Rothschild plan

The scheme proposed by Teitjen, the Danish delegate, is treated with indifference. It may be dropped without discussion by the conference. The proposals advanced by Sir C. Houldsworth, though applauded by pronounced bi-metallist lelegates yesterday, are not considered by his colleagues worth wasting time over in liscussion. His plan will probably be referred to a committee to-morrow and never be heard of again. The uncertain attitue of French delegates is influencing other representatives whose countries belong to he Latin union.

It has been a cause of complaint that ther members desirous of a frank opposition to or cooperation in the Rothschild plan communicated these proposals to the French delegates before they were submitted to the conference, and were led to believe the French delegates would sup-port the plan. Had they believed othervise they would have reconsidered the question of presenting the plan. It is the opinion of many delegates that the French overnment does not desire the confer nce to decide anything.

An interview has been published here with Leon Soy, the well-known French

Soy declared be thought that the attitude of both the English and American delegates deplorable, especially the Ameri-cans, who appeared to be without definite sals. Soy could not understand why the British, as practical business men. ter which was their own concern. In regard to the Rothschild proposals Soy declared he thought they solved nothing, and added he thought the deliberations of the conference would end in nothing. Soy's remarks define the action of the French delegates, who criticize everything said in the conference or in the commit-tee, but suggest nothing. Opinions among the delegates have become more clearly defined and partisans of the single and double standards are proving more

irreconcilable as the discussion develops Henry W. Cannon of the American delgates asked the committee to discuss the proposals of the American delegates as stated in the conference. Montefore Levi, president of the conference, opposes the committee's proceeding to discuss the American proposals. A majority of the committee concur in the opinion of Levi. Hon. E. Terrell, American minister to Belgium, will give a banquet in honor of the delegates to-morrow. A grand municipal reception at the hotel has been fixed for December i6. This will wind up the fetes in honor of the delegates until after Christ-

Murder and Suicide.

PORTLAND, Ore., Dec. 7.—A sensational tragedy occurred here at midnight. Charles R. Moulton shot and instantly killed Mrs. Mary S. Storey, leader in musical circles, then put a bullet through his own brain. He had long pleaded an unsuccessful suit for her hand, and her final refusal to marry him led to the trag edy. Mrs. Storey's two children were asleep in an adjoining room when the shooting occurred.

Delayed Trains.

St. Joseph, Mo., Dec. 7.—Two trains from Denver on the Rock Island are snow bound, one at Phillipsburg, Kan., and the the other at Holton, Kan. Grand Island reports a train blockaded at Hanover. The Santa Fe reports traffic on the line not seriously impeded by the snow storm in Kansas. The trains are late, however. Dispatches at midnight state that the storm has abated.

Chinese Exclusion.

WASHINGTON, Dec. 7.-The treasury department has decided that a Chinese merchant who left the country 20 years ago and engaged in business in China, thereby forfeited his domiciliary rights to the United States and cannot return here without a certificate from his own govern ment required by the Chinese exclusion

UNCLE SAM'S FINANCES

Annual Report of the Secretary of the Nation's Money Box.

REVENUES RECEIVED

of the Governmen -Cash Now on Hand-Recom mendations Relating to Various Matters.

WASHINGTON, Dec. 7 .- The annual re port of Secretary of the Treasury Foste shows the government's revenue from all sources during the past fiscal year was \$425,868,260; expenditures, \$415,953,807; leaving a surplus of \$9,914,453. With the cash balance, national bank redemption fund and a few small items added, the surplus is \$40,750,468, which was applied to the redemption of bonds and national

Compared with the fiscal year '91 the re ceipts have fallen off \$32,675,972, th principal loss being customs receipts \$42, 069,241 and in profits on coinage of \$5,681. On the other hand, there was a ga of \$4,998,690 in internal revenue receipts onds and other matters which made up the difference. The interest on the pub-lic debt has increased \$14,169,019.

For the present fiscal year the revenues are estimated as follows: From customs \$198,000,000; internal revenue, \$165,900,000 miscellaneous, \$20,000,000; postal service. tures as follows: Civil establishment \$108,000,000; military establishment, \$49,000,000; naval establishment, \$31,000,000; Indian service, \$9,000,000; pensions, \$158. 000,000; interest on public debt, \$26,000,000; postal service, \$80,336,350. Total, \$461,336, 350, leaving an estimated surplus for the year of \$2,000,000. The available cash balance in the treasury at the end of the fiscal year was \$120,992,378.

The revenues for the year of 1894 are es timated at \$490,121,365; the appropriation required at \$457,261,335; exclusive of the sinking fund or an estimated surplus of \$32,860,030, which with the cash balance above the gold reserve would make the available balance \$53,852,466. Deducting accruing obligations would leave \$47.852, 407. Chargable against this are the unexpended river and harbor and ordnane appropriations of \$44,000,000, and no ac count is taken of the sinking fund re quirements amounting to \$48,600,000 beond redemption estimated at \$5,000,000.

The secretary says the estimated re-ceipts are on the basis of the condition prevailing prior to the late election. Pub ic opinion having decreed a changed policy in the tariff, has altered the condi tions and rendered it impossible to estimate the annual income with any degree of accuracy and impossible to predict the effect of the proposed radical changes in future revenues. But then the inevitable result of a tariff reduction agitation will be a falling off in importations and revenue. He says the facts fully justify the opinion that the large increase in receipts are ascribable to the marvelous prosperity of the country under the present revenue laws, and would, if continued, enable the department during the coming fiscal year meet its obligations without pairment of its cash and thereafter con tinue to show a material improvement in

The sinking fund shows \$990,510,681 more than required by law is credited to it. The treasury has difficulty with the limited amount of cash on hand above the \$100,-000,000 redemption fund to keep a suffi-cient stock of gold, and if shipments continue as large as during the past two years the gold in the treasury will be diminished below the reserve line. The maintenance of silver at par has also increased a possible charge upon the gold The secretary therefore suggested the redemption of government obligations should be increased to at least 2) per cent, of the amount of treasur notes issued or to be issued under the act of July 14, 1890. In view of the probable falling off in receipts he thinks the revenue should be increased to enable treasury to maintain a gold reserve of not less than \$125,000,000. He suggests an additional tax on whiskey as an easy method of increasing the revenue.

The secretary says whatever may be the outcome of the international monetary conference it will give a clearer idea of the views and purposes of the countries represented.

Speaking of immigration, the secretary is clearly of the opinion that only by a rigid examination made at the place of departure was the prohibitive feature of the law executed with any considerable deficiency. The remedy for the evils of immigration, the secretary says, is within control of congress. The secretary rec ommends an increase of head tax. As a measure to determine what this tax should be he suggests a sum that would be such as will equalize the cost to immigrants to reach South America or Aus

Speaking of the Chinese exclusion act, the secretary says notwithstanding the severity of the law, many Chinese get into the country, chiefly through Canada. He thinks it probable that a large number of Chinese laborers will enter the United States under the provisions for the admission of Chinese exhibitors at the world's fair and their employes. The secretary renews his recommendation in his last annual report that early action be taken by congress toward such legislation as will make use of the metric system of weights and measures obligatory in transactions at the custom houses on and after the first day of January, 1895.
On the subject of seal fisheries he says:

"The number of seals on the breeding grounds on the islands is found to be smaller this year than last."

The secretary calls attention to the activity of the marine hospital bureau the past summer and fall owing to the threat-

to keep in force the 20-day restriction until congress will have an opportunity to express its will in the matter, or until the danger which prompted it has disappeared. Where railroads cross from Canada into the United States no baggage of immigrants is admitted without previous disinfection. Reference is made to the establishment of Camp Lowe on Sandy Hook, and the secretary says additions will be made to the camp during the winter with a view to its utilization should cholera again appear in the spring and winter with a view to its utilization should cholera again appear in the spring and summer. On the subject of quarantine the secretary says the state laws can not properly control or direct the management of a great quarantine when other states are interested. The whole country should have a voice in their ownership and management, and this can only be accomplished by such legislative action as will forbid the collection of quarantine fees by state or municipal authority, and which shall direct assumption of all quarantine duties by the United States. Every serious epidemic in this country known has been traced to immigrants and it must be evident that the same authority that controls immigration should conit must be evident that the same author-ity that controls immigration should con-trol quarantine. Admitting that any par-ticluar local quarantine may be perfectly managed of what avail is it if a neighbor-ing port has either a lax or insufficient quarantine or uone at all?

IT IS LACROSSE NOW.

Lovers of the Canadian Game Organiz a Club.

music hall for its first grand opening and as soon as the hall is completed the club will give a ball which will be one of the society events of the season. The com-mittee appointed last night to look after the matter will make the most elaborate and extensive arrangements, and nothing will be left undone which will in any way

kane team is also contemplating a trip through Montana next summer and the Butte team will take a go at it if it comes within reach. Another meeting of the club will be held Friday evening.

the Leadville driller. To-day's Helena Independent says: "Jack Freethey of Marysville, the backer of Joe Freethey and Tom Tallon, the great drilling team of Butte, called at the Independent office yesterday to answer the challenge of John Ahearn of Denver, Mr. Freethey says that his brother and Tallon have an agreement. contest he will match the team against Ahearn and his partner for any amount of money, the contest to take place in any town in Colorado or Montana. He thinks that if a Colorado town is chosen the Colorado drillers should pay the expenses of the Montana team or vice versa if a Montana town is chosen. Mr. Freethey is very anxious to make the match and is confident that Montana will carry off the laurels. He says that he will do anything in his power to make satisfactory arrangement of the terms."

The Butte men who telegraphed the Leadville papers that they would back Freethey and Tallon against Ahearn and any partner he could select for \$5,000, have so far received no reply.

Matthew Doyle, at whose place the recent quested by the tool boys of the Anaconda and Syndicate mines to offer prizes for a drilling contest for boys of 20 years of age and he will probably do so. The boys are evidently catching the fever from their fathers and they are getting it bad too.

Tickets will be limited to 60 days for going passage, with return any time within the final limit of six months. Stop over privileges in each direction; through sleepers from Butte to Portland. Sleeping car reservations and further information can be had by calling at 23 East Broadway, Butte, Mont. W. M. Tuohy, general agent.

Chicago's Population.

There is probably no city of importance in the world that can show such rapid and wonderful growth as Chicago since its destruction by fire. To-day its population is about 1,200,000. Mr. Peter Van Schaack, one of the leading merchants of that city said in conversation, that a large number of his personal friends, as well as scores of representative men throughout the Northwest with whom he had conversed upon the subject had found St. Leader Oil a paintening and healing remedy of subject, had found St. Jacobs Oil a pain-curing and healing remedy of the most extraordinary efficacy. It is the Great Remedy for Rheuma-tism, Neuralgia, Sciatica, Backache, Bruises, Burns, Swellings etc.
